

IPOINT Connect (Wedge)

Description

The IPOINT Connect Base, also known as The Wedge, is a lower cost permanent mount alternative to the Connect Pro. The key difference being that iPads mounted to The Wedge are permanently affixed to the base. When combined with the IPOINT Ethernet Adapter this base will directly connect to the iPad rather than connect via pins, leading to a more direct connection with virtually zero chance of interruption of data. All sizes of iPads are supported. 9th Gen Lightning iPads are still WIFI ONLY.

Who it's for

Merchants looking for a modern looking alternative to the Revel C Stand that offers the same connectivity and protection that IPOINT bases and cases offer.

Who it is NOT for

Locations looking for a quick way to mount and dismount an iPad.
